*The Funds invest in securities of foreign issuers, including issuers located in countries with emerging capital markets. Investments in such securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. The Quant Foreign Value Small Cap Fund invests in small company stocks. Small company stocks trade less frequently and in a limited volume, and their prices may fluctuate more than stocks of other companies and may therefore be more vulnerable to adverse developments than those of larger companies.
